RAISED SPOT UV

on Suede

Discover the Perfect Spot for Effective Branding

Mixing the eye-catching effect of spot UV with the smoothness of suede, Raised Spot UV on Suede cards are bound to increase brand awareness and create a big marketing impact. They feature a 1.5mil scuff resistant, soft velvet laminate, elevating the 16pt card stock into a dramatic 19pt thickness. The raised spot UV application measures 50 microns and is offered on 1 or 2 sides, heightening the level of elegance far beyond what regular spot UV offers. It's the perfect way to accentuate details in logos, images and text. For best results, it's recommended to keep the spot UV coverage under 30%.
