Raised Foil on Suede

Take Branding to a Whole New Level

Raised Foil on Suede takes the next step in truly unique branding. Mixing the sharpness of metallic embossment effects with the silky smooth finish of suede, they are sure to get noticed in any situation. Raised Foil cards are printed on 16pt stock and laminated on both sides with a 1.5mil scuff resistant, soft velvet laminate. The result is a dramatic 19pt thickness. The vibrant foil is available in gold, silver or one-of-a-kind holographic, and is printed on the front only, with no debossing on the back. This leaves a velvety finish where additional information can be printed and read with ease.
